SUMMARY

Product-focused professional with 3+ years of experience across design, engineering, and early-stage product development. Have led customer discovery, MVP scoping, prioritization, experimentation, and product launches that drove adoption, retention, and revenue growth across AI, SaaS, and marketplace products. seeking to transition into a Product Management role where I can combine technical depth, customer empathy, and business thinking.

EXPERIENCE

Technical Consultant (Product & Growth), [Enviu](#) ²

Oct 2025 – Present

- Owned full product lifecycle from discovery to launch of **Stymo** ², a multi-vendor deadstock marketplace: conducted user interviews with **15+ vendors** to map deadstock pain points, synthesised insights into a prioritised roadmap, and shipped consumer, admin, and warehouse platforms.
- Drove **123,000 sessions** and **Rs. 374,000 GMV** in the first **45 days** post-launch, liquidating **400+ items** and validating the core donate-and-discount workflow through rapid iteration.
- Defined and tracked product metrics across the full funnel (browse, add-to-cart, checkout); used drop-off data to redesign the checkout flow, improving completion rate.
- AI-powered cataloging reduced vendor listing time by over **60%**, a direct output of iterating on post-onboarding user feedback.
- Ran weekly sprint reviews and maintained a **RICE-prioritised backlog**, aligning warehouse ops, vendor success, and engineering stakeholders throughout.
- Identified a market gap through **20+ buyer and seller interviews** for **Qilin** ², translated findings into user stories and MVP scope for a P2P thrifting app targeting Gen Z resellers.
- Built and scaled Qilin on Bubble.io (web, PWA, Android, iOS); achieved **4,000+ users**, **1,500+ app downloads**, and **400 daily active users** within 3 months of launch.
- Defined GTM strategy around social-first growth: seeded the platform with curated listings, partnered with **10+ micro-influencers**, and tracked referral-to-signup conversion as the growth metric.

Software Engineer, [Driveo Electric Pvt. Ltd.](#) ²

Sep 2024 – Oct 2025

- Launched **EasyV EV SaaS** ², a real-time EV monitoring dashboard with ML-driven alerting on IoT telemetry, reducing vehicle downtime by **30%** and accelerating issue resolution by **50%**.
- Led an AI-powered natural-language SQL interface that unlocked self-serve analytics for non-technical users, increasing platform adoption by **45%** and cutting time-to-insight by **~70%**.
- Shipped a real-time LLM assistant for an automotive CRM with voice and text interactions, cutting average resolution time by **35%** and lifting CSAT to **90%+**.
- Built a modular, embeddable chatbot platform with plug-and-play architecture, reducing onboarding time by **60%** for **200+ enterprise customers**.
- Re-architected core data and image pipelines to absorb a **3x traffic spike** with zero downtime, cutting page-load times by **40%**; A/B-tested ranking logic to halve search latency.
- Embedded Mixpanel across **8 product flows** for a KPI-driven feedback loop, and built a reusable design system in Bubble that cut development cycles by **30%**.
- Built an Indian AI voice caller and WhatsApp-based lead-qualification automation, increasing conversion rates by **40%** and cutting manual SDR effort by **80%**.
- Built **CredOps**, a linear AI pipeline using Python and GPT-4o that ingests EV fleet telematics and generates a structured CIBIL-score-equivalent creditworthiness report for banks, bridging a gap in EV fleet financing.

- Shipped **Sherpa**, a B2B SaaS for personalised Oracle ERP training: ran **10+ user interviews** to map learning gaps, shaped the GTM strategy, and produced enterprise-pitch promo ads in under 24 hours, lifting learning absorption by **45%** and cutting training time by **35%**.
- Led design-to-launch of an **AI Chrome Extension** that auto-generated Oracle ERP documentation as PDF and voiceover video, cutting documentation time by **70%** and scaling training to **50+ enterprise clients**.
- Designed an ERP community mobile app, sustaining **60% monthly active engagement** through content-driven loops informed by weekly user-feedback sessions.
- Designed and launched **YECC eCampus**, the company's first move into the undergraduate market, repackaging recorded ERP trainings to acquire UG students and upsell the flagship program.

LIVE FREELANCE PRODUCTS

OneSherpa – AI-Native ERPNext Implementation Platform

Rebuilt the AI pipeline on LangGraph with 4 specialized agents replacing one linear chain, then moved the primary model to Claude Haiku, cutting inference cost over 60%. Also redesigned and built all 5 core screens myself, from dashboard to login.

Real-Time BookMyShow Sales Tracker for SmallWorld

Conducted User Research with 40+ users to prioritise feature development and increase bookings, Tracks 10,000+ events with data never more than 90 seconds stale, running at 99%+ uptime since launch on a platform with no public API. Now the daily numbers source for 50+ event organizers over Telegram, no dashboard required.

Osho Discourse Library

Open Source forked Music Player with Osho Discourses, Got 200+ users overnight with 1 Reddit post; over the last 90 days it's pulled 602 visitors, 12.9k page views, and a 28-minute average session. Few changes made based on active user feedbacks. Free PWA, no backend or database, with transcript search and offline listening built in.

SKILLS

- Product:** Roadmapping, RICE, MoSCoW prioritisation, user research, JTBD, GTM strategy, stakeholder management, agile/scrum, backlog grooming, cross function collaboration
- Analytics:** Product metrics, funnel analysis, A/B testing, KPI dashboards, Mixpanel, Looker Studio, PostHog, Google Analytics, cohort & retention analysis
- Design:** Figma, wireframing, hi-fi prototyping, design systems, usability testing, iteration cycles, accessibility, interaction design
- Technical:** Bubble.io, Supabase, REST APIs, Flutter, React, JavaScript, Python, LangChain, LangGraph, GCP, SQL, Make/n8n

EDUCATION

BS in Data Science, IIT Madras	2023 – 2024
Diploma in Electrical Engineering, GP Bramhapuri	2020 – 2023
